A Software Engineer with 10+ years of experience delivering high-quality applications across E-Commerce, Social Networking, and Real Estate platforms. Strong expertise in Kotlin, Java, Android architecture, and complementary backend experience in C# .NET. Skilled in full-stack development, debugging, testing, reviewing design/requirements, and collaborating in Agile environments. Possess T-shaped capabilities across mobile, backend, Automation testing, and system design, aligned with business goals.

SKILLS

Programming Languages: Kotlin, Java, JavaScript/TypeScript, C#

Frameworks & Technologies: Android, KMP, Jetpack Compose, RxJava, .NET, PostgreSQL, Entity Framework, REST API, GraphQL, WebSocket

Tools: Git, Firebase, CI/CD, Agile/Scrum, Jira

Other: Cross-functional collaboration, Mentorship, Debugging, and System design

EXPERIENCE

WealthPark Co., Ltd., Japan

Senior Android Engineer

April 2024 - Jan 2026

- ▶ Architected a robust, offline-first Android application from scratch using Kotlin, Jetpack Compose, and Hilt, creating a scalable foundation for future feature expansion.
- ▶ Building the UI automation suite from the ground up using Espresso, Kakao Cup, and Kaspreso, and integrating it directly into the CI/CD pipeline.
- ▶ Enforced code quality and stability by implementing static analysis tools (ktlint, detekt) and LeakCanary, significantly reducing technical debt and regression bugs.
- ▶ Designed and implemented networking layers using REST, GraphQL and WebSocket, ensuring seamless data synchronization between local Room databases and backend services.

Nanameue, Inc., Japan

Senior Android Engineer

Sep 2021 - Mar 2024

- ▶ Modernized a high-scale social networking platform (1M+ installs, 100K+ DAU), migrating legacy code to a modern stack featuring Jetpack Compose, Clean Architecture, and Koin.
- ▶ Spearheaded the integration of Web3 technologies into the native Android environment, enabling secure blockchain interactions and expanding the app's capability set.
- ▶ Enhanced application performance and stability by refactoring the codebase to MVVM, resulting in reduced crash rates and improved UI rendering times.
- ▶ Led the quality engineering strategy for new features, utilizing rigorous unit testing and UI automation to ensure a seamless experience for a massive daily user base.

King Power Click Co., Ltd., Thailand

Lead Software Engineer

Nov 2020 - Aug 2021

- ▶ Directed the engineering strategy and system architecture for a new E-Commerce platform, overseeing technical decisions across Mobile, Web, and .NET Core backend.
- ▶ Led cross-functional engineering teams through the full SDLC, defining technical roadmaps and ensuring alignment between business requirements .
- ▶ Designed scalable backend APIs and integration points, bridging the gap between legacy systems and modern applications to ensure high availability and performance.
- ▶ Collaborated with product and other teams to deliver aligned feature implementations.

Android Team Lead

Aug 2017 - Oct 2020

- ▶ Orchestrated the technical modernization of the Android team, transitioning the team to Kotlin and Clean Architecture while adopting GraphQL, RxJava and Coroutines.
- ▶ Engineered automated CI/CD pipelines and standardized release processes, reducing manual deployment errors and accelerating release cycles.
- ▶ Mentored a team of Android developers, fostering a culture of technical excellence through code reviews, architectural workshops, and improved testing workflows.

Android Engineer (ShopSpot Mobility Pte. Ltd.)

Oct 2014 - July 2017

- ▶ Standardized Android development workflows, driving the migration from Java to Kotlin and implementing MVP/Clean Architecture to improve code maintainability.
- ▶ Partnered with backend engineers to optimize API contracts, ensuring efficient data handling and reducing payload sizes for mobile clients.
- ▶ Improving product reliability through rigorous defect analysis and debugging, ensuring high-quality delivery during major feature rollouts.

EcartStudio, Thailand

Android Engineer

May 2013 - Sep 2014

- ▶ Integrated in-house map services to the Android applications.

Softgear Co., Ltd., Thailand

Software Engineer

Mar 2012 - Mar 2013

SIDE PROJECTS

- ▶ [Android DrawableBadge](#) library for adding badges to drawables.
- ▶ [Android SheetSelection](#) library for displaying list items as a BottomSheet.
- ▶ [Alerter](#) contributes a library that is a robust version of Toasts and Snackbars.
- ▶ [Staff of Thai Kotlin developer community](#)

EDUCATION

Chiang Mai University

Jun 2008 - Mar 2012

Bachelor's Degree of Computer Science
